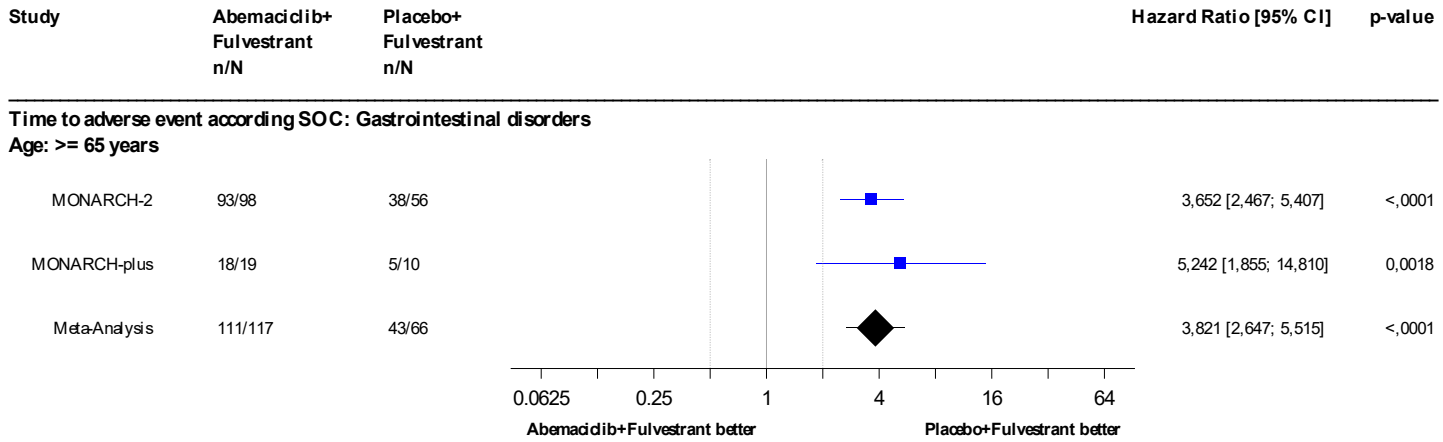
Figure 1255.1.1.2: Metaanalysis results for adverse events according SOC[1] -
Gastrointestinal disorders
Subgroup analysis for Age: >= 65 years
Safety Population - Postmenopausal (1st line) (MONARCH-2 and MONARCH-plus)



Heterogeneity: Cochran Q-test=0,4068, p-value=0,5236, I2 index=0%
Abbreviations: CI: Confidence Interval; n: number of patients with event; N: number of patients; NE: not evaluable; SOC: System Organ Class

1: Adverse events occurring in ≥10% of patients in one treatment arm, and events occurring in ≥10 patients and ≥1% of patients in one treatment arm, based on the pooled numbers of both combined trials. Only endpoints with p-value of Z-test <0.05 in main analysis are taken into account.
