Data cut-off: 20.06.2019, Safety-Population
The table shows p-values of the interaction term of subgroup factor and treatment group from Cox proportional hazard model.
NE: not evaluable/not calculated. The interaction test is only performed if each subgroup category comprises at least 10 patients and at least 10 events have occurred in one of the subgroup categories.
Abbreviations: CTCAE: common terminology criteria for adverse events; PT: Preferred Term; SOC: System Organ Class.

Datenschnitt: 18.05.2020 Diese Tabelle zeigt p-Werte der Interaktionsterme von Subgruppenfaktor und Behandlungsgruppe aus Cox-Proportional-Hazard-Modellen. NB: nicht berechnet. Ein Interaktionstest wird nur gerechnet, wenn jede Subgruppenkategorie mindestens 10 Patienten umfasst und mindestens 10 Ereignisse in einer der Subgruppenkategorien aufgetreten sind. Abkürzungen: CTCAE: Common Terminology Criteria for Adverse Events; ECOG-PS: Eastern Cooperative Oncology Group-Performance Status; EORTC: European Organisation for Research and Treatment of Cancer; mBPI-sf: Kurzfassung des modifizierten Fragebogens Schmerz; PT: Preferred Term; QLQ-C30: Standardisiertes Instrument zur Messung der Lebensqualität; SMQ: Standardised MedDRA Queries; SOC: System Organ Class.

Diese Tabelle zeigt p-Werte der Interaktionsterme von Subgruppenfaktor und Behandlungsgruppe aus Cox-Proportional-Hazard-Modellen.
NB: nicht berechnet. Ein Interaktionstest wird nur gerechnet, wenn jede Subgruppenkategorie mindestens 10 Patienten umfasst und mindestens 10 Ereignisse in einer der Subgruppenkategorien aufgetreten sind.
